CAREER OBJECTIVE

Junior front-end developer with more than 1 year of experience designing and building responsive websites and web applications. Proficient with HTML, CSS, JavaScript Frameworks such as React/NextJS. Notable achievements include working within a high-paced agile delivery environment implementing all scrum best practices. My goal is to use code to build web applications that can make a real positive impact in people's life.

WORK EXPERIENCE

Front-end Developer

Analogteams

July 2020 - February 2021 / Washington DC

- Collaborated with a distributed team of 8 members including UX/UI, Back-end developers, and DevOps to build a website and provided end-to-end solutions for clients.
- Taught other frontend developers the skills to reduce bundle size of Tailwind CSS by purging all unused Tailwind classes in production websites that improved page loading time by 45%.
- Set up a development pipeline and implemented CI/CD in Jira and BitBucket to deploy a front-end application to AWS using industry best practices which saved the company \$40 per month.
- Collaborated with the UX/UI design teams to improve the website and UX, increasing conversion rates by 30%.
- Rebuilt client website which was running on a legacy code and improved loading speed by 80% using modern technologies and industry best practices.

Front end developer

Freelancer

July 2019 - July 2020 / Mansfield

- Collaborated with a UI/UX designer to rebuild a client website using NextJS which improved performance by more than 70%.
- Worked on a client website to improve accessibility and SEO by more than 80% using Google's Lighthouse automated tool.
- Saved client \$20 per month by integrating Formspree on the website for customers to subscribe to newsletter.

Logistic Specialist

British Army

November 2013 - June 2019 / London

- Developed excellent customer service relationship with the clients to understand their needs which eliminated unnecessary delays and increased productivity by 40% in the first quarter of the year.
- Exceeded annual delivery targets by 25% by encouraging and implementing a consistency working routine within a team of 7 members.

PROJECTS
